

FEATURES & BENEFITS

ensures surface conductivity after drying

LOGISTIC DATA

Type	N-77/400 ML
Index Ergom	E05CE-01010101401
Quantity in package [ml]	400

Colloidal graphite-based spray, makes almost every surface conductive. Leaves a thin silver-grey film that perfectly adheres to plastic, metal, wood, glass, ceramic, etc. It totally eliminates the dangerous electrostatic build-up that often causes damages or incorrect operation. Main applications: measuring instruments, delicate electronics. Moreover, N-77 is a perfect solution to regenerate potentiometers or electron tubes in TVs and monitors.
