

FEATURES & BENEFITS

cleaning product for monitors, TV screens, etc.

LOGISTIC DATA

Type	S-35/200 ML
Index Ergom	E05CE-01010101501
Quantity in package [ml]	200

A spray foam designed for cleaning and deeply disinfecting TV and computer monitors, printers and other office equipment. The operation of these machines often causes electrostatic charges which increase the attraction of dust: S-35 is an effective solution since it cleans and, thanks to its antistatic properties, prevents formation of dirt and nesting of bacteria. It is a very good solution if used as a degreaser for glasses, mirrors, tables, desks, work or school benches (in metal, plastic, Formica, Plexiglas, PVC...etc.). Compatible with most materials, it doesn't scratch, abrade or streak.

NOTE!
